Migrating Wazuh APIs to event-driven architecture on FastAPI, including a distributed job scheduler, to manage thousands of customer environments.

PROFESSIONAL SUMMARY

Backend Engineer with 5+ years designing distributed systems and scalable APIs in Python and AWS. Go knowledge oriented to high-performance microservices. Active code reviewer with AI-assisted development (Claude Code).

SKILLS

- **Backend:** Python (Flask, FastAPI, Pytest, Boto3), Go, Java, OpenAPI/Swagger.
- **Cloud & Infra:** AWS (Lambda, API Gateway, DynamoDB, S3), Docker, Microservices.
- **Databases:** PostgreSQL, MySQL, DynamoDB (NoSQL).
- **Frontend:** React, TypeScript.
- **Tools:** Claude Code, Cursor AI, Git, GitHub, CI/CD, Code Reviews, Agile/Scrum, N8N.
- **Languages:** English (B1 - Intermediate) | Spanish (Native).

WORK EXPERIENCE

> **Wazuh, Inc.**, Córdoba, Argentina: *Software Engineer* | APR 2023-PRESENT

- Built and maintained 13 REST APIs (Python/Flask, OpenAPI) + 10 Jobs (AWS Lambda) + ReactJs frontend for a cybersecurity SaaS with 500 users.
- Migrated environments API from Flask to FastAPI towards an event-driven design pattern. Designed and built a job scheduler service in Python for automated and event-based task management.
- Implemented observability and monitoring with AWS CloudWatch, X-Ray and Lambda Insights, with automated Slack alerts and daily metrics review.
- Designed and implemented a backoffice system with Appsmith and N8N for the sales team, including discrepancy detection between environments and contracts.

> **IncluIT**, Córdoba, Argentina: *Software Developer Engineer* | MAY 2019-APR 2023

- **Intel Contractor:**
 - Developed an IoT vehicle fleet monitoring system with Python/Flask, integrating Intel hardware, Machine Learning and AWS (IoT Core, EC2, S3).
 - Implemented real-time monitoring with Thingsboard for metrics visualization and vehicle location on map.
 - Co-led the project and participated in hiring and training 2 junior developers.
- **Telecom Contractor:**
 - Developed frontend and backend features for Telecom Personal's mobile (Java Spring) and web applications, handling peaks of up to 11000 concurrent users.
 - Led production deployments and client coordination during the final months of the project.
- **McAfee Contractor:** Bug fixing and automated testing (PyTest, Docker) on a cybersecurity product, with CI/CD on GitLab CI. Knowledge transfer to team in India.

PERSONAL PROJECTS

Expense Tracker: Expense management PWA with React + FastAPI, serverless API on AWS (Lambda, DynamoDB, Cognito).

EDUCATION & CERTIFICATIONS

UNC, Córdoba: **Computer Engineering** | FEB 2008-JUN 2022

AWS IAM (Platzi, 2024) | Serverless Framework (Platzi, 2024) | Python avanzado (LinkedIn, 2023) | Go esencial (LinkedIn, 2019)
